

Bronze Glass

Bronze Glass is dark-tinted glass option. The opaque bronze colored glass is protective and visually pleasing.

This adds to the privacy and comfort of the glass, while reducing levels of glare.

Bronze tinted glass adds a dark coloration, similar to car window tint, but with a reflective bronze hue that acts as a colorful design-cue; ideal for both interior and exterior glass.

More characteristics of Bronze Glass:

- Adds privacy
- Provides cooler indoor temperatures
- Reduces glare
- Reduces transmission of UV (ultraviolet) rays
- Golden hue

Used In:

- Doors
- Partitions
- Storefronts
- Bathrooms
- Showers
- Exteriors
- Glass Shelves
- Skylights
- Windows
- Table Tops

Available Edge Work:

- Bevelled Edge
- Pencil Polish Edge
- Flat Polish Edge
- Seamed Edge

Grey Glass

Grey Glass is the premier tinted glass type. This dark, silver-based tint looks grey and allows for less flow of light (reduced light transfer).

This adds to the privacy and comfort of the glass, while reducing levels of glare.

If you're looking to keep the sun out, to add a level of privacy in your shower enclosure, or a touch of style to a glass shelf kit, then grey glass is the tinted glass option you've been looking for.

More characteristics of Grey Glass:

- Added Privacy
- Provides Cooler Indoor Temperatures
- Reduces Glare
- Reduced Opacity

Used In:

- Doors
- Partitions
- Storefronts
- Bathrooms
- Showers
- Exteriors
- Glass Shelves
